Critical

Patient Information

Patient Name:
Trizia Mae

Patient ID:
NkYWgun87zfYeaLHY8okMlIoq8Z2

Assessment Details

Assessment ID:
wYgUwFc4SYdKx7k61Sbn

Assessment Date:
2025-10-16 03:46:50

Assessment Type:
Cataract Risk Assessment

Status:
Completed

Assessed By:

Reported Symptoms

Frequent prescription change

Clinical Notes

Reported symptoms (1/7): Frequent prescription change. Symptom score: 75%. Conclusion: High risk of symptoms. Recommend prompt ophthalmology referral.

Cataract Risk Assessment Result

High Cataract Risk

Based on the assessment, this patient should be referred to an ophthalmologist within 2 weeks for a comprehensive eye examination. Their symptoms strongly suggest cataract development that may require surgical intervention.
